CIM Carts - Robust. Reliable. Safe.

Mobile solutions for telemedicine

Carts are an important feature in healthcare facilities and critical care areas. Lightweight, customizable, infection-control-friendly, and easy to maneuver, carts provide quick and flexible access to medical equipment. A well-designed medical cart not only improves the lives of caregivers and patients, it protects them. That's why compliance to IEC 60601-1 should be your first consideration when buying a medical cart. All CIM carts, whether pre-configured models or custom-designed solutions are fully compliant. Our carts are collapse-resistant. They pass impact and threshold testings to ensure that they withstand accidents and general wear and tear. We consider infection prevention, rough handling, strain on the user, tensile safety factors, correct labeling or pinch points. Safety without compromise when it comes to the lives and well-being of people.

Product marking

All CIM carts are CE marked. As medical product risk class 1 they are conform with the regulations (EU) 2017/745 (MDR) and IEC 60601-1, 3rd Edition. The current standard IEC 60601-1 for electrical and mechanical safety is the 3rd Edition. Other standards of the IEC 60601 series are not applicable to our products, regardless of their version.

Qualified modularity without fear

Modularity is the use of similar modules in multiple products. This allows designs to be customized, upgraded, repaired or adjusted to future demands. With less than a 100 components CIM med may offer thousands of cart combinations. The benefits of modularity are obvious. While swapping components as requirements change seems to optimize the return on investment, we have to consider that adjusting a medical product must be thoroughly documented to prove conformity and later traceability. At CIM med, we never leave anything in the grey zone.

MONITOR & KEYBOARD CART

-  Monitor specific mounting adapter
-  Keyboard tray with or without fold-up function
-  Smooth design for easy cleaning
-  Infection-control friendly materials
-  Lockable castors
-  Compact design for space-constraint situations

OPTIONAL ACCESSORIES

-  Additional accessories page 8

CART FOR TELECOMMUNICATION

Facilitates communication between physician, caregiver and patient. Ideal for use in all medical departments as well as care homes or doctors' offices.

- + Ergonomic workstation
