

DIGITAL INSTRUCTIONS FOR USE

As part of our sustainability strategy, we now provide the Instructions for Use in digital format.

The latest version can be accessed at any time via the QR code attached directly to the product. By switching from printed to digital documentation, we reduce our paper consumption by approximately **1,150 kg per year**, thereby contributing to resource conservation and environmental protection. In addition, digital availability offers several advantages: Access to the most up-to-date documentation at all times, fast and convenient retrieval via smartphone or tablet and worldwide availability – anytime and from any location.

PREVIOUS PROCESS

A printed version of the Instructions for Use was supplied with each support arm.

CURRENT PROCESS

Each support arm is equipped with a QR code providing direct digital access to the Instructions for Use.
